## SHEN ZHEN SUNBOW INSULATION MATERIALS MFG.CO.LTD. PVDF Heat Shrink Tubing

## Model Number: SB-PVDF-HST

Working temperature: $-55^{\circ} \mathrm{C} \sim 175^{\circ} \mathrm{C}$

## Structure

These thin wall heat shrinkable tube are the polyvinylidene fluoride composed and treated in radiation modification. This tubing possesses good wear \& heat resistant, oil \& chemical solvent resistant and flame retarding.

## Characteristics

1. High withstand to abrasion and cut-through
2. Excellent chemical and solvent resistance
3. Shrink Temperature: $175^{\circ} \mathrm{C}$
4. Shrink ratio: 2:1

## Usage

Semi-rigid thin wall PVDF heat shrink tubing, ideal for electronic, automotive and military applications requiring protection and see-through inspection. It can be widely used in high temperature, industrial fuels, solvents and chemical erosion of weld, terminal and the connection to protect the cables.
